SUMMARY

Im an HTML developer specializing in front-end web development with over a year of professional experience. My journey as a developer began in early 2022, and since then, I have been continuously expanding my skills and knowledge in the field.

I am passionate about creating responsive and user-friendly websites, and I strive for excellence in every project I undertake. I am dedicated to staying up-to-date with the latest industry trends and technologies, ensuring that I deliver high-quality solutions to meet client requirements.
