- Npm
- AJAX, JSON
- jQuery(basic)
- Horoshop.ua

SOFT SKILLS

-Communication
-Time management
-Training ability
-Analytical thinking
-Adaptability
-Tolerance

LANGUAGES

English(Pre-Intermediate)

Ukrainian(Native)

Russian(Native)

SUMMARY

Im an Frontend developer with over a 2 years of professional experience. My journey as a developer began in early 2022, and since then, I have been continuously expanding my skills and knowledge in the field.

I am passionate about creating responsive and user-friendly websites, and I strive for excellence in every project I undertake. I am dedicated to staying up-to-date with the latest industry trends and technologies, ensuring that I deliver high-quality solutions to meet client requirements.

I also live abroad, which provides constant access to the Internet and the ability to always be in touch without interruptions caused by power outages.

WORK EXPERIENCE

FRONTEND DEVELOPER | GOLDENCOMPASS

Jul 2023 - Mar 2024

-Communicating with people
-Conversation in english

PROJECT EXPERIENCE

Best & People | GitHub

Apr 2024 - June 2024

- Online store with database on Next.js and TypeScript
- User registration and authorization via Auth.js
- Sorting and filtering options: filtering based on categories and price, also sorting from cheap to expensive and vice versa
- Adding and removing products from the cart, as well as selecting the number of products
- Placing an order with connecting a new mail, which helps you choose a branch
- Checking payment, if payment is successful, sending the order to the telegram channel of the website customer

Pet Soft | GitHub

Mar 2024 - Apr 2024

- Service for managing a daycare center for pets on React and TypeScript.
- Adding animals: adding new pets to the kindergarten database, adding complete information including name, breed, age, weight, photos as well as allergies or diseases.
- Owner Information: adding contact information about the owner, including name, phone number and address, as well as notes about the owner's preferences and wishes.
- Status of stay: tracking the status of your pet's stay in kindergarten in real time.
- Payment via Stripe
- User registration and authorization via Auth.js

RMT Dev | GitHub

Jan 2024 - Feb 2024

- Job search service on React and TypeScript
- Search for vacancies: implementation of a search field in which you can enter keywords such as position or technology (for example, "React"), the search results are displayed in the form of a list, where each vacancy has brief information: position, company name, number of days since moment of publication.
- Users filter jobs by relevance or date posted
- Job Information: Includes job title, company, description, employment type, expected salary and location.
- Job management functions: the ability to save vacancies of interest by adding them to bookmarks.

Golden Compass

Aug 2023 - Sep 2023

- Responsive(Grid + Flex) layout using the BEM methodology, and Sass preprocessor
- Complete project assembly using Webpack / Gulp
- Optimization for fast loading speed
- Interactive JavaScript
- WordPress
- Mobile adaptation
- Animations using the animate.css library
